

PRUshield Motor Insurance

Keep all your journeys secured

Because we know that life is a further destination

Your Vehicle *is* at Risk

PRUshield Vehicle Protection Package

Many Malaysians today are concerned that their personal safety will be endangered as thieves resort to robbery and hijack to steal vehicles. Alarming rates of vehicle theft are confirmed by statistics from the general insurance industry.

Prudential Motor policyholders can choose to increase their personal protection from robbery and hijack by joining the PRUshield Vehicle Protection Program.

Through the program, you will enjoy the protection of CAPTOR, Malaysia's leading anti-theft service provider which includes 24-hour monitoring and recovery services.

CAPTOR has a proven recovery success record and has recovered hundreds of vehicles with the support of the Royal Malaysian Police.

The Prudential-CAPTOR Vehicle Protection Program is designed for all vehicle models and operates to enhance the existing security features of the vehicle. Most important, you gain peace of mind that your vehicle is protected at all times.

Do *not* be Helpless

How can I protect my car from being stolen?

Car thieves' modus operandi is either by hot-wiring, tow-away, robbery or hijack. Besides the car alarm system, another common device to avoid car theft using all these methods is the vehicle tracking and recovery systems.

Isn't a car alarm system, steering wheel lock or immobilizer sufficient to protect me from vehicle theft?

NO. It takes only less than a minute for a professional thief to disable your car alarm system (complete with immobilizer) before applying the hot-wiring method and driving it away. Steering-bar locks hardly deter professional thieves as it can be easily overcome by coating it with *nitrogen-oxide* liquid before hammering it into tiny bits of "steel ice".

Immobilizers may be good enough to protect your car from being hot-wired but only half of the time. They may be overcome and by-passed given enough time. Furthermore, immobilizers do not protect you from the other possibilities of tow-away, robbery and hijack.

Which system should I protect my car with then?

Prudential recommends that you protect your car with the CAPTOR – RF Comprehensive Vehicle Security System by joining the PRUshield Vehicle Protection Package. The program is supported by its own recovery teams, 16 on-ground teams and 2 airborne teams.

Have Peace of Mind with the PRUshield Vehicle Protection Package

Why should you choose PRUshield Vehicle Protection Package?

To recover your car when stolen.

- To protect you and your loved ones in the event of robbery and hijack.
- To minimize the hassle and inconvenience of loss of car usage.
